## Student Feedback Report on Curriculum (2019-20)

SN	QUESTIONNAIRE	Score
<b>OVERALL AVERAGE SCORE</b>		<b>3.22</b>
1	The learning experience gained through the syllabus of the course.	3.38
2	The depth of the Syllabus.	3.23
3	The sequence of the topics contained in the syllabus.	3.24
4	The size of the syllabus in terms of load on the students.	3.05
5	The existing internal examination system in relation to the progress of the syllabus within the stipulated time span.	3.17
6	Motivation generated by the syllabus towards reference reading.	3.22
7	The adequacy of library holdings in terms of the needs generated by the syllabus.	3.25
8	Impetus generated by the syllabus towards students' progression.	3.2
9	<p><b>Suggestions on changes to be made in the syllabus. (Some Notable Suggestions)</b></p> <p>1) Exhaustive Curriculum , focusing more on bringing out the best by using quality education as well as laying more effort on pushing the limits and extremes of a student need to be adapted . Honours should be given much more weightage than at present compared to general subjects for Honours candidates .</p> <p>2) If graphics practical would be included and programming language would be increased in syllabus then it would be better.</p> <p>3) Need to add some interesting Topics...&amp; practical based conceptual.. Topics...which will be further used in many ITs company... It will helps the students to like &amp; learn more... Thank you</p> <p>4) Bioinformatics part could have a much detailed one.</p>	

- 5) Everything related to the syllabus is not upto the mark as the recent cbcs system competing to the other state boards i think some major changes is needed.Same goes to the library section.But all over experience is very good.
- 6) Hospital/Industrial Internship should be added in the course.... This will help to gain practical knowledge...
- 7) During the pandemic session I couldn't access the library works properly... The syllabus is quite vast..it should be compact in more way.. Internal examination structure was good... But it could be way more Better than now... Other wise whole system is just OK...
- 8) My views are only according to me :-Syllabus is very beneficial for the further studies but some topics are seem to be extra like at graduation level the whole depth knowledge od some topics are quite difficult and some topics are just seem to be useless at this level.But ya I must say that the syllabus and topics are very helpful for me to gain knowledge in my favorite areas.Just this.Otherwise satisfied.
- 9) Supplementary nutrition this type of topic if added then this will be help with paediatric nutrition
- 10) Pattern of learning. There should be more application based learning process so that the students can dive deep into the subject matter .
- 11) The learning process should be more application based so that the students can dive deep into the subject matter.
- 12) (1) I think syllabus of pg microbiology need to modified. Our syllabus is oriented on UGC NET exam thats good but, when you doing post graduate on microbiology we need also focus on Bacteria, virus and their genomics, gene editing, immunology, cancer and RNA silencing, modification in more depth. (2) Our practical must be modify as soon as possible. Most of the practical is from Bsc degree and no new one was added. Some new practical topic is in syllabus but, noone doing those practical. So, we need to modify our practical by adding new practical in pg for student growth. (3) We also need change some guest teacher as soon as possible, they are very good but, now they are aged and need to change to recruit some fresh guest teachers
- 13) Need to include more topics on bioinformatics
- 14) Practical should be taught in the college more and more so that student can learn clearly about practicals at any stream or particular subject
- 15) Syllabus was lengthy , It can be improved by making it a bit short. Need more books in Library for sociology students, only limited books are available.
- 16) Learning should made practical, so that student can relate it from syllabus
- 17) From my opinion I want to share something to my college that... first one is classes should be regular and be on time,subject faculty should be best , syllabus should be change and make or design the syllabus which is required or related to somehow IT sector touches the requirements then only will students makes their interest in studies and learn more score more and do more in future... Thank you
- 18) If there were some topics related to BTech courses in the syllabus and practical part of Graphics were included then it will be good for students.
