Learning Management System

A Learning Management System (LMS) is an online system or software which is used to plan, execute, and assess a specific learning process. The college LMS enables students to get their teaching plans, study materials, lecture notes, assignments, syllabi, and so on to get all class resources under one platform. Teachers can also track the development of the students as well.

Video Lecture

Videos provide students with an engaging sensory experience. They appeal to a wide audience and enable more efficient processing and memory recall. Video lessons help teachers to present the topic in an interesting way and allow the viewers to see information from different perspectives. The Videos not only help the students to recapitulate the topics taught but also help if s/he was absent in the class.
